

OUR ENVIRONMENTAL POLICY

As Europe's leading brand of water and coffee in the workplace, it is our mission to provide you with a convenient source of hydration and well-being, to help you take better care of yourself every day at work. We understand that this sense of well-being also requires that our products are made in a caring and responsible way that preserves the environment for future generations.

Water is one of our planet's most precious resources, and as our principle product, we are acutely aware of the importance of protecting it. Eden Springs Group believes that we have a responsibility to care for and protect the environment in which we operate. We are fully committed to improving environmental performance across all of our business activities, and will encourage our business partners and members of the wider community to join us.

Eden Springs Group has conducted several lifecycle assessments according to international standards and recognises our 3 key impacts to be in the areas of:

- Energy use
- Transports
- Material use

In line with the United Nations Global Compact's principles on the environment we commit ourselves to:

- Continually assess the environmental impact of all our operations via independent environmental auditing experts;
- Develop innovative eco-design in our products and activities;
- Select suppliers who continuously strive towards improving the efficiency and sustainability of their operations and use of resources;
- Adopt an environmentally sound transport strategy
- Provide meaningful and accurate environmental information about our products and activities based on scientific evidence;
- Provide environmental awareness training and education for our employees and encourage employee involvement in environmental actions.
- Minimise waste through careful and efficient use of all materials and energy.
- Purchase sustainable products wherever feasible [e.g. recycled, FSC or low environmental impact products and energy from renewable sources].
- Offset all or parts of our CO2 emissions in collaboration with the CarbonNeutral Company.

Eden Springs Group has developed several actions to supplement each of our environmental policy commitments. Details of these can be found on our website and we will periodically review performance and update these results.
